Value Creation Process

The NTN Group has identified materiality for addressing SDGs in order to solve social issues, and is conducting its business activities based on its corporate philosophy, utilizing the management capital and NTN characteristics that have been cultivated over our more than 100 years of history.

By providing products and technical services such as bearings and driveshafts and by creating environmental and social value, we aim to realize a “NAMERAKA Society” where people can easily lead a secure and fulfilling life in harmony with nature. Going forward, we will continue to promote ESG management to achieve sustainable growth and to contribute to solving social issues.
