	Total of Categories 1 to 15	1,781,619	2,141,775	2,336,679	2,134,343	2,025,995	100.00%	94.92%	

*1 Calculated using the emission factors provided in the "Database on Emission Factors for Calculating Greenhouse Gas Emissions throughout the Supply Chain (Ver. 3.5)" published by the Ministry of the Environment, Japan.
*2 Emissions previously calculated under Category 9 have been reclassified to Category 4 after the Company identified an error in their category classification. Accordingly, figures for FY2021 through FY2024 have also been retrospectively reclassified. The third-party assurance performed at the time confirmed the validity of the calculation process and the underlying data but did not assess the appropriateness of the category classification. Although the historical data received third-party assurance based on the category classification used at the time, the figures after reclassification are outside the scope of that assurance. However, the reclassified figures are based on the same underlying data, and the total figures remain unchanged.
*3 "Not applicable" indicates categories that do not apply due to the nature of the Company's business or that the Company has determined to be of low materiality.
*4 A circle (○) indicates that the figures received third-party assurance for the relevant fiscal year based on the category classification used at that time.
